

TRAINING OVERVIEW

OEE – Overall Equipment Effectiveness

TRAINING

INITIAL SITUATION

- Ideal for companies that begin their process of continuous improvement.
- For companies that want to improve their system of losses collection by machinery.
- For companies that want to establish world class indicators in the performance of their work.

CONTENT / REMARKS

- Selection and Definition of losses.
- Develop the method of collection of losses and codify them.
- Define those responsible and train them in the registration method.
- Create a database.
- Define the critical machines where the OEE will apply.
- Calculate the OEE and verify the trend.
- Make improvement.

On site training / Kaizen week:

- On site real line conditions review (1 week)

Online / remote training:

- OEE simulation and real examples for better understanding.
- Perspectives from different companies and industries

TARGET GROUP

Project Management

Engineering

Quality

Logistics

Production

Maintenance

TOP GOALS

- ✓ Improvement of equipment availability.
- ✓ It improves the performance or efficiency of the equipment.
- ✓ Product quality improvement.
- ✓ Process standardization
